

Inventory Software

Optimize Your Stock, Maximize Your Profits

What is Inventory Software?

****Inventory Software**** is a powerful and essential tool designed to help businesses efficiently manage their entire stock lifecycle. From tracking products and automating purchasing to streamlining sales and providing real-time insights, it ensures accurate record-keeping, prevents costly stockouts or overstocking, and optimizes your supply chain operations.

Key Features & Modules

Product / Stock Management

- Keeps accurate records of every item in your stock
- Add/Edit/Delete Products
- SKU / Barcode generation
- Product categories, brands, and variants (Size, Color, etc.)
- Stock levels: opening, in-hand, damaged, returned
- Stock transfer between warehouses/branches
- Real-time stock visibility

Purchase Management

- Helps control your buying process from vendors
- Create Purchase Orders (PO)
- GRN (Goods Received Note)
- Track Pending and Completed Purchases
- Manage supplier information
- Auto-stock update after receiving goods
- Set reorder levels for auto alerts

Sales & Billing Management

- Fast billing with tax and discount handling
- Sales invoice generation
- Apply taxes (GST/VAT) and discounts
- Product-wise pricing control
- POS (Point-of-Sale) system integration
- Customer database with loyalty points
- Cash, Credit, UPI, Card payments accepted
- Sales returns and exchange management

Inventory Alerts & Notifications

- Stay informed and avoid stockouts or overstocking
- Low stock alerts
- Expiry date tracking (for perishable items or medicine)
- Stock reorder reminders
- Daily/weekly stock summary notifications

Reporting & Analytics

- Make data-driven decisions with powerful reports
- Daily Sales & Purchase Report
- Profit & Loss Report
- Inventory Valuation Report
- Product Movement (Fast/Slow moving items)
- GST/Tax Reports
- Customized Report Export (Excel/PDF)

Multi-Location / Multi-Warehouse Support

- Useful for businesses with more than one location
- Branch-wise inventory control
- Inter-branch stock transfer
- Centralized monitoring of all branches

User Management & Security

- Controlled access based on roles
- Create multiple user roles (Admin, Sales, Purchase)
- Assign permissions module-wise
- Track user activity and logs
- Secure login with OTP or password

Mobile App Support

- Operate your inventory software from anywhere
- Android / iOS access
- Real-time sales entry from mobile
- View reports on the go
- Alerts and stock checking via app

Integrations

- Seamlessly connect with other tools
- Accounting Software: Tally, Zoho Books, QuickBooks
- eCommerce Platforms: Shopify, WooCommerce
- Barcode Scanners & Printers
- CRM or Lead Management Tools

Backup, Cloud & Offline Support

- Keep your data safe and always accessible
- Cloud-based daily auto-backup
- Offline mode in desktop version
- Syncs when connected to internet
- Data export/import options
